Zeon LumenArc Light Source
1 Introduction

This manual describes the setup, installation, start-up, and use of the Zeon® LumenArc™ Light Source.

Indications

Use of the Zeon LumenArc Light Source is indicated for dental lighting applications requiring a remotely located, high-quality white light. This product must only be used by qualified dental personnel.

Contraindications

The use of the Zeon LumenArc Light Source is contraindicated for applications where high intensity light might burn or damage tissues; such as for neonate transillumination and ophthalmic procedures.

For further contraindications, the user must also consult the operating manual of the instrument being used with the Zeon LumenArc Light Source in the medical procedure.

Warnings

A warning statement in this manual identifies a condition or practice which, if not corrected or discontinued immediately, could lead to patient injury, illness or death.

**WARNING**  RISK OF FIRE. Do not operate on, near, or over combustible material. Operate only on smooth, hard, flat surface. This device is not suitable for use in the presence of a flammable anesthetic mixture. An explosion may result.

**WARNING**  The high intensity light at the front of the light source and at the tip of the Fiber Optic Bundle will create high temperatures and bright light. To minimize the risk of injury, avoid direct viewing or contact with sensitive tissues.

**WARNING**  Do not use for neonate transillumination. Erythema may result.

**WARNING**  To prevent temporary blinding, always plug the fiber optic bundle into the Zeon LumenArc Light Source and set the light intensity control to minimum before turning the power ON.

**WARNING**  If this light source is used during invasive surgery, the failure of a component within the system, causing loss of illumination, may indirectly cause risk to the patient. Therefore, it is recommended to have alternative means of illumination available.

**WARNING**  When the unit is on, never disconnect the fiber optic bundle from the Light Source or the accessory from the end of the fiber bundle. High intensity light from the end of the fiber optic bundle can ignite combustible material.
**Cautions**

A caution statement in this manual identifies a condition or practice which, if not corrected or discontinued immediately, could lead to equipment failure, equipment damage, or data loss.

**Caution**  Do not sterilize the Zeon LumenArc Light Source. Refer to Cleaning section for cleaning instructions.

**Caution**  Do not switch the Zeon LumenArc Light Source ON and OFF in rapid succession. Doing so will dramatically shorten lamp life. Allow lamp to cool down 10 to 15 seconds between uses.

**Caution**  Do not operate device without the cover in place. Operate in the horizontal orientation only.

**Caution**  Do not use or store liquids above or on the Zeon LumenArc Light Source.
Caution  Allow the lamp to cool before replacing.

Caution  Since the Zeon LumenArc Light Source uses a custom lamp, always have a spare lamp available for replacement. USE CAUTION BECAUSE LAMP MAY BE HOT. Allow lamp to cool before replacing.

Caution  Any changes or modifications made to this device that are not expressly approved by SDS-Orascoptic will void the warranty and may compromise product safety.

Caution  United States Federal law restricts this device to sale by or on the order of a health care practitioner.

Caution  Only qualified dental personnel should operate the Zeon LumenArc Light Source.

Caution  System integrator is responsible for all safety testing, including optical and thermal testing.

Caution  It is recommended to test the dental composite with and without the optional filter prior to use with a patient.
System Description and Operation

The Zeon LumenArc Light Source is used to supply high quality, white light for optical illumination systems.

1. Verify the power switch is in the OFF position (●). Place the light source on a smooth, hard, level surface with at least 3” air clearance between the light source and any solid objects. Plug the power supply into a grounded receptacle.

2. Turn the light intensity control knob to the minimum position (see Figure 1). Plug the fiber optic bundle into the light port and connect the distal end to the instrument.

   Note For proper lamp performance, verify the fiber optic bundle is plugged in at all times.

3. Turn the power switch to the ON position (○). The lamp will take 10 to 15 seconds to complete the warm-up cycle.

4. Set the light intensity knob to the desired level (see Figure 1).

5. Turn the unit OFF when not in use.

   Note Do not restart the Zeon LumenArc Light Source immediately after shutting it off - it may fail to light. If this occurs, turn the power off and wait 10 - 15 seconds before turning the unit back on.

The optional filter blocks light wavelengths that cure some dental composites. For white light, switch the filter out of the light path. When working with dental composites, switch the filter into the light path (Figure 1).

   Note It is recommended to test dental composites with and without the optional filter prior to use with a patient.

This section provides information to replace a lamp and to clean the Light Source. There are no other serviceable parts within the Light Source.

Lamp Replacement

**CAUTION:** LAMP MAY BE HOT. Allow lamp to cool before handling. Recommended lamp cooling time is a minimum of 600 seconds/10 minutes.

To Replace the Lamp

1. Turn the Zeon LumenArc Light Source off and unplug the power cord from both the wall outlet and the rear of the unit.

2. Remove the five screws from the Zeon LumenArc Light Source using a #2 phillips head screwdriver. Pivot the cover to expose the lamp.
Figure 2. Moving the Top Cover

3. Flip up the retaining latch. Pull the lamp base back and up against the retaining spring to remove the lamp.

4. Remove lamp with harness attached and then disconnect the lamp connector.

Figure 3. Inside the Light Source
5. Replace with Zeon LumenArc replacement lamp AL-BULBS-LA24W-SOL only. DO NOT touch the lamp or the interior reflective surface of the lamp. Skin oils on the lamp will cause premature lamp failure. Hold the lamp by the outside of the reflector or the base only. Remove any grease or fingerprints with a clean Q-tip moistened with alcohol. Do not leave any lint on the lamp.

6. Connect a new lamp to the connector and insert lamp to properly seat the alignment pin located on the bottom of the lamp into the slot located on the lamp bracket.

Figure 4. Bottom View of Lamp Slot

7. Close the retaining latch and replace the cover. Secure the five screws on the Zeon LumenArc Light Source. Reconnect the power supply.

Do not operate the device without the cover in place. Dispose of the lamp according to local, state, and federal laws.
Cleaning

**Caution** Do not sterilize or immerse the Zeon LumenArc Light Source.

**Caution** Do not submerge the Zeon LumenArc Light Source in water, cold sterilants, or in an ultrasonic cleaner.

**Caution** Do not use an autoclave, chemiclave, glutaraldehyde, iodophor or any other sterilization method, or damage may result.

Clean the Zeon LumenArc Light Source, monthly, or as required as follows:

1. Prior to cleaning, turn power off and disconnect the power cord from both the wall outlet and the Zeon LumenArc Light Source.

2. Clean the external surfaces with a cloth dampened with mild soap and water or use the following cleaning/disinfecting solutions. Always follow the manufacturer’s recommendations.
   - A quaternary ammonium disinfectant such as CaviCide®
   - A phenol alcohol-based spray such as Lysol® brand disinfectant

   If there are any questions, please contact Customer Service.

3. Wipe the power cord using the same cleaning/disinfecting solutions listed above. Wipe dry with a clean cloth. Care must be taken not to get the plug prongs wet. DO NOT IMMERSE.

4. Do not plug the unit into a wall outlet until it is thoroughly dry.
Repair

For trouble shooting or repair information in the US, contact SDS-Orascoptic at 1-800-369-3698; outside the US, contact your local distributor.

Caution  Only qualified personnel can make electrical inspections and repair of the Zeon LumenArc Light Source.

</table>

Radiated and Conducted Emissions were tested using the Elgar power source. It complies with the EN55022 Class B limits and FCC part 15 which has same limits as EN55011 Group 1, Class B. Harmonics and Flicker was tested at 230VAC/50Hz, which is within the device’s rated input voltage and power frequency.
Guidance and Manufacturer’s Declaration - Immunity.

The Model Number ZS-LA24W-01N is intended for use in the electromagnetic environment specified below. The customer or user of the Model Number ZS-LA24W-01N should ensure that it is used in such an environment.

Conducted RFI and Radiated RFI testing was performed on the EUT. The light output was monitored for changes in intensity and color.
Recommended Separations Distances between portable and mobile RF Communications equipment and the Model Number ZS-LA24W-01N.

The Model Number ZS-LA24W-01N is intended for use in the electromagnetic environment in which radiated disturbances are controlled. The customer or user of the Model Number ZS-LA24W-01N can help prevent electromagnetic interference by maintaining a minimum distance between portable and mobile RF Communications Equipment and the Model Number ZS-LA24W-01N as recommended below, according to the maximum output power of the communications equipment.

Warranty And Service

SDS-Orascoptic, a division of Kerr Corporation, warrants the Zeon LumenArc Light Source, when new, to be free of defects in material and workmanship, as a limited warranty, and to perform in accordance with manufacturer’s specifications, when subject to normal use and service from SDS-Orascoptic or its authorized agent for a period of one year from the date of purchase (the “Warranty Period”). The Warranty Period begins on the original date of purchase.

At its sole discretion, SDS-Orascoptic will either repair or replace the complete product with either a new or refurbished equivalent product, or repair or replace any components found to be defective, excluding the lamp and fuses, FOB at the SDS-Orascoptic facility in Middleton, Wisconsin, USA. It shall be the purchaser’s responsibility to return the product, in appropriate packing materials, so as to prevent accidental breakage in transit, and sufficiently cleaned and disinfected, directly to SDS-Orascoptic. SDS-Orascoptic reserves the right, at its sole discretion, to refuse to repair or replace the product if the product is deemed to be unsanitary. It will be the responsibility of the purchaser to arrange for the product to be returned to the purchaser for appropriate cleaning and sanitation, and the purchaser shall be responsible for all shipping charges.

This Warranty does not cover the Solarc Lamp, or breakage or failure due to tampering, misuse, neglect, accidents, improper installation, modification, shipping, or to improper
maintenance, service or cleaning procedures. This Warranty is also void if the Zeon LumenArc Light Source is not used in accordance with manufacturer’s recommendations or instructions, if serviced by other than SDS-Orascoptic or its authorized agent, or if the serial number has been removed or altered in any way.

In no event shall SDS-Orascoptic’s liability be greater than the original purchase price of the product. Nor Shall SDS-Orascoptic be held liable for consequential or special damages, or for transportation, installation, adjustment or other expenses, which may arise in connection with such products or parts. This product warranty applies only to customers in the United States of America (USA), Canada or to units sold to and by authorized and approved international dealers. This Warranty is non-transferable and shall only apply to the original purchaser of the product, as exclusively contained in SDS-Orascoptic’s records. THIS WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ALL OTHER STATEMENTS, WARRANTIES OR GUARANTEES, EXPRESS OR IMPLIED, BY SDS ORASCOPTIC OR ITS AUTHORIZED REPRESENTATIVE, INCLUDING WARRANTIES WITH RESPECT TO DESCRIPTION, QUALITY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. The limits and exclusions contained herein shall apply unless otherwise prohibited by applicable law.
